Width:	420	mm
Depth:	400	mm

Materials

Sitka spruce from Alaska
Picea sitchensis

Design

by: Waldemar J. Homan (2012)

Chair with comfortable ergonomic angles for sitting and backs area. This chair was originally designed as a chair for grown-ups. It was scaled down to children's sizes, but not every part in an equal ratio. This gives the chair the stout look and makes it appear to be a children's seat, even without reverences.
