Sipo mahogany
Swietenia ssp

Design

Original idea by: Tânia Nobre (2012)

Detailed design by: Waldemar J. Homan (2012)

Chair with ideal ergonomic angles for sitting and backs area. It can be adapted for smaller or bigger persons. The square arm rest sides are placed apart just as far as the size of the square itself, thus forming a cube. The seat seems to be hanging in the squares, giving it a volatile appearance even though the wood sizes are not exaggeratedly thin. This follows the philosophy of reducing to the most essential shapes much alike the early 20st century Dutch movement *De Stijl*.
