Fraxinus excelsior
Sipo mahogany
Swietenia ssp
Steel tubings
Cotton matrass and
pillow casings

Design

by: Waldemar J. Homan (2011)

Spacious sofa with comfortable angle for backs and sides. The sofa combines steel tubes and ash wood laths. The steel tubing gives more flexibility and therefore softens the supports. The repetition in lines, angles and natural colors create a resting point that balances the vividness of the wood structure. Design with simple pure lines that merges ergonomics with beauty.
