

Table and chairs 1

Sizes

Miniatures at scale 1:5

Materials

Alaska Yellow Cedar
Callitropsis nootkatensis

Merbau
Intsia bijuga

Design

by: Waldemar J. Homan (2011)

In this design repetitive angles and symmetry in multiple mirror planes make the set look surprisingly different, depending on the viewpoint. The warm dark red brown of the Merbau combines very well with the yellow of the Alaska Yellow Cedar. The design offers also very practical advantages: the legs of the chairs and the table are not interfering with each other. So far the set has only been made at scale 1:5, as a form study.
